

Sakks Tech Security

Protect the lifeblood of your digital enterprise: Data

Data security services from Sakks Security

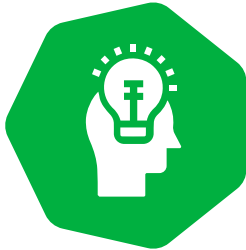

Data is perhaps the most important asset to an enterprise and must be protected as such. Sakks Security's portfolio of trusted and scalable managed data security services helps enterprises to protect their critical data in the most cost effective and compliant way by providing flexible, scalable and highly adaptable security solutions that defend them against modern day cyber threats.

Our service provides several key capabilities to customers.

- Discover and classify data across the entire enterprise, regardless of state (at rest, in motion or in use)
- Ensure that data remains within the enterprise and provide alerts, should there be a data leakage or data breach
- Receive the reports you need to satisfy auditors and to maintain compliance requirements

Sakks Security's data security solutions are a part of a broad portfolio of fully managed security services designed to help our customers meet their security challenges.
